

The No Smoking Hillbillies

(Sing to the tune of the Beverly Hillbillies)

Let me tell you all the theory bout smoking cigarettes, a really bad habit
that most live to regret.

Your hands turn yellow and your breath smells bad, your health gets
worse and that would be so sad.

Devastating that is...cancer, emphysema.

Well next thing you know you're feelin' kinda low, the only way to talk is
with the hole that's in your throat.

You know you can avoid it if you listen here to me, you gotta quit it now
before your lungs are history.

Cold turkey, that is: Join the Majority.

Well now it's time to give support to Max in her pursuit; she's gotta quit it
now before we all give her the boot.

We've all been gathered here this week to speak our piece and say, we
wanna wish you luck and a happy birthday.

You can do it now, ya hear!
